Lumen Labs Quarterly Operations Review, Q3 2026

1 Overview

Lumen Labs manufactures optical sensors for agricultural drones in three plants. The third quarter was marked by the launch of the LX-4 sensor and by a heat wave that slowed production in August.

2 Production

2.1 Output by site

Lyon remained the largest site of the group, while Turin was still ramping up its second assembly line. The output of each plant is shown in the chart below.

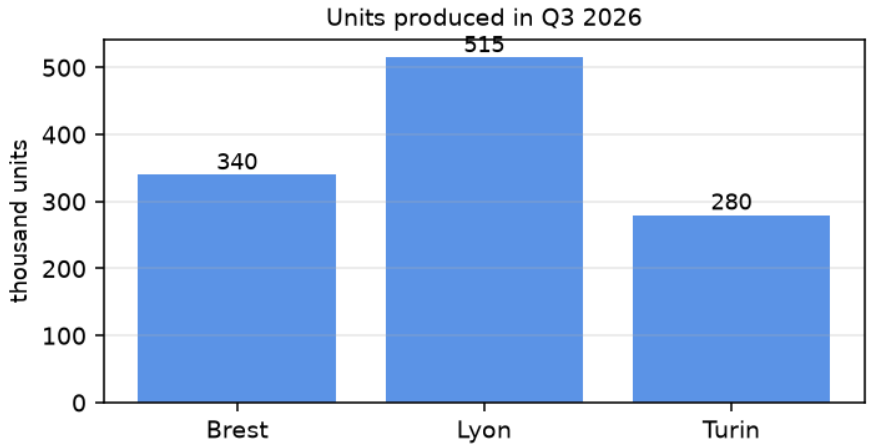

Figure 1. Units produced per site in the third quarter, in thousands.

2.2 Defect rates by batch

Every batch is inspected before shipping. A defect rate above 2.5 percent triggers a root cause analysis by the quality team; the rates of the quarter are listed below.

Batch	Site	Units	Defect rate (%)
B-101	Brest	1800	0.6
B-102	Lyon	1837	1.3
B-103	Turin	1874	0.7
B-104	Brest	1911	1.4
B-105	Lyon	1948	0.8
B-106	Turin	1985	1.5
B-107	Brest	2022	0.9

Batch	Site	Units	Defect rate (%)
B-108	Lyon	2059	1.6
B-109	Turin	2096	1.0
B-110	Brest	2133	1.7
B-111	Lyon	2170	1.1
B-112	Turin	1807	1.8
B-113	Brest	1844	1.2
B-114	Lyon	1881	0.6
B-115	Turin	1918	1.3
B-116	Brest	1955	0.7
B-117	Lyon	1992	1.4
B-118	Turin	2029	0.8
B-119	Brest	2066	1.5
B-120	Lyon	2103	0.9
B-121	Turin	2140	1.6
B-122	Brest	2177	1.0
B-123	Lyon	1814	1.7
B-124	Turin	1851	1.1
B-125	Brest	1888	1.8
B-126	Lyon	1925	1.2
B-127	Turin	1962	0.6
B-128	Brest	1999	1.3
B-129	Lyon	2036	0.7
B-130	Turin	2073	1.4
B-131	Brest	2110	0.8
B-132	Lyon	2147	1.5
B-133	Turin	2184	0.9
B-134	Brest	1821	1.6
B-135	Lyon	1858	1.0
B-136	Turin	1895	1.7
B-137	Brest	1932	2.9
B-138	Lyon	1969	1.8
B-139	Turin	2006	1.2
B-140	Brest	2043	0.6
B-141	Lyon	2080	1.3
B-142	Turin	2117	0.7
B-143	Brest	2154	1.4
B-144	Lyon	2191	0.8
B-145	Turin	1828	1.5

Batch	Site	Units	Defect rate (%)
B-146	Brest	1865	0.9
B-147	Lyon	1902	1.6
B-148	Turin	1939	1.0

3 Staffing

Headcount reached 1,240 employees at the end of September.[1] The training programme on the LX-4 line was followed by 310 operators.

[1] Including 85 people on temporary contracts hired for the LX-4 launch.

4 Outlook

The company expects its output to rise by six percent in the fourth quarter, once the second assembly line of Turin reaches its nominal speed.
