Valmora Wine Cooperative Bulletin, Harvest 2026

1. Harvest overview. The 2026 harvest started on 4 September and ended on 2 October. The 214 member growers delivered 9,850 tonnes of grapes, eleven percent more than in 2025.

2. Grape quality. The average sugar content reached 22.4 degrees Brix. The working group reviewed the quality criteria at each of its monthly meetings and recorded every decision in the minutes, so that the reasoning behind each choice can be traced by later teams.

2.1. Hail damage. A hailstorm on 18 July hit the plots of the northern slope; 37 growers declared losses, covered by the mutual fund of the cooperative.

3. Payments. The advance paid at delivery is 0.62 euros per kilogram. The balance will be paid in March, once the wines of the vintage have been valued.

4. Next general assembly. The general assembly will take place on 12 December in the cellar hall; members who cannot attend may give their proxy to another member.
